

Replacement Sliding Door Panels

BEFORE (RETAIL STOREFRONT)

AFTER (1 WEEK LATER)

NEED TO REPLACE A **DAMAGED SLIDING DOOR PANEL?**

When you need a replacement door panel because of a snatch and grab; damage by wind, storm, drive-through, break-in, or abuse; or in need of custom sizes, call us at 800-437-3667 and mention the code **CHOP**. Our turnaround time on standard equipment is approximately 1 week on clear or dark bronze anodized finishes, and 10-15 working days on painted finishes (depending on color match requirements).

Door Controls provides top of the line packaging to secure your order. We have many manufacturers available, including: Stanley, Besam, and Horton. Not only do we provide replacement door panels, we can provide the replacement parts as well.

Door Controls can also build replacement panels to conform to local codes, such as requiring a positive latch on ICU doors. We can provide a new panel or fabricate a new leading edge stile with the latch.

Positive Latch Stile
